ABSTRACT

Designed to enable Queensborough Community College to predict with greater accuracy the impact of changing enrollments on the number of credits generated in particular departments, this report provides data tables showing the relationships between curriculum and department in terms of credits and/or remedial hours generated. Tables 1 through 18 provide a three-semester (fall 1980 and spring and fall 1981) breakdown of credits, and remedial hours where appropriate, for 18 departments: art and design; basic educational skills; business; biological sciences and geology; chemistry; electrical and computer technology; English; foreign languages and literature; health, physical education, and dance; history; mathematics; mechanical technology and design drafting; music; nursing; physics; social science; speech communication and theatre arts; and "unknown" department. For each department, number and percentages of credits/remedial hours are given for each of 24 curricular majors, e.g., photography certificate, business accounting, business data processing certificate, business transfer, fine and performing arts, liberal arts, pre-nursing, nursing science, pre-engineering, and non-degree. The remaining three tables present: (1) total credits and remedial hours by department, curriculum, and semester; (2) credits by curriculum and department for fall 1981; and (3) credits and/or remedial hours converted into full-time equivalencies. A LONGITUDINAL ANALYSIS OF DEPARTMENTAL CREDITS BY CURRICULUM FOR FALL 1980, SPRING 1981 AND FALL 1981 SEMESTERS

The major purpose of this analysis was to provide data on the interrelationship between curriculum and department in terms of credits and/or remedial hours generated to better predict the impact of changing enrollments in the various curricula on departmental credits.

The attached tables (1 through 19) present a longitudinal breakdown of credits, and remedial hours where appropriate, by department. For each department the number of credits and percentages of the total appear next to each curriculum for the three semesters, Fall 1980 (8009), Spring 1981 (8102) and Fall 1981 (8109).

There are two ways to look at the data in these tables. First, each department may look to itself by analyzing its own table to determine the extent to which various curricula contribute to the department's total number of credits.

In the second way, departments that have responsibilities for programs or curricula may look at other departments to determine the college-wide impact of their curricula.

By considering the longitudinal data in the attached tables, departments may be able to predict with greater accuracy the impact of curricular changes on the number of credits generated in a particular department. Retrospectively, for example, in the Art Department table, the number of credits generated by Liberal Arts students decreased from 839 (44.3%) in Fall 1980 to 677 (40.9%) in Fall 1981, the result of diminishing numbers of LA students. Using this approach,

affected departments will be able to devise a plan to deal with what appears to be a curricular trend.

Prospectively, for example, the Business Department anticipates a substantial increase in the number of students in Data Processing over the next five years; the Business Department may then examine its own longitudinal table to better estimate the number of credits that may be taken by DP students in its own department for this period. At the same time, other departments may estimate the impact of increasing number of DP students at the College, by proportionately increasing DP credits taken in each of their departments.

Table 20 collapses Fall 1981 data from Tables 1-19 into one table to facilitate departmental and curricular comparisons.

Table 21, an outgrowth of Table 20, was constructed by converting credits and/or remedial hours into full time equivalent students (FTE^S). (FTE^S = Number of credits and/or remedial hours divided by 15).

The raw data in this report were extracted from the student data base by the QCC Data Processing Center as part of QCC's response to provide a five year academic plan to the Central Office of CUNY.

To keep the data up-to-date, tables showing the relationships between credits generated by departments and the various curricula will be produced each semester.

Appendix A defines the curricular codes used in the tables.

* FTE^S = the number of credits and/or remedial hours divided by 15.

APPENDIX A

QUEENSBOROUGH COMMUNITY COLLEGE CURRICULUM CODES

CODE	CURRICULUM
AP	Photography Certificate
BA	Business Accounting
BD	Business Data Processing Certificate
BL	Real Estate and Insurance
BM	Business Marketing
BN	Transportation
BS	Business Secretarial
BT	Business Transfer
BW	Word Processing Certificate
CT	Computer Technology
DD	Design Drafting
DP	Data Processing
EH	Environmental Health
ET	Electrical Technology
FA	Fine and Performing Arts
LA	Liberal Arts
LS	Liberal Arts and Science
ML	Medical Laboratory Tech.
MT	Mechanical Technology
NP	Pre-Nursing
NS	Nursing Science
PE	Pre-Engineering
PN	Nuclear Physics
NM	Non-Degree
